Summary

Currently enrolled in the UNC at Charlotte Full-Stack web development boot camp with a focus on JavaScript and React. Coming from the automotive industry where I spent 8 years developing problem solving skills, time management, led teams, and have trained new hires.

Projects

◆ **Hiking Trail Locator Web App**

An application that utilizes open source APIs to interact with each other in order create a user friendly experience.

◆ **Weather Dashboard**

A weather tracking web app that utilizes JavaScript to dynamically create HTML elements with corresponding data.

◆ **Day Planner**

Created a day planner that allows and stores user input. The application also responds to the time of day with color coded time slots.

Education

◆ **UNC at Charlotte Full-Stack Coding Boot camp**

Currently enrolled
