Summary

Currently enrolled in the UNC at Charlotte Full-Stack web development boot camp with a focus on JavaScript and React. Coming from the automotive industry where I spent 8 years developing problem solving skills, time management, led teams, and have trained new hires. I look forward to transferring these skills to a new career in Web Development.

Projects

◆ [Hiking Trail Locator Web App](#) – [github repo](#)

An application that utilizes open source APIs to interact with each other in order create a user friendly experience.

◆ [Retro Backlog](#) – [github repo](#)

Full-Stack application working with JavaScript, node.js, heroku, and mysql.

◆ [Weather Dashboard](#) – [github repo](#)

A weather tracking web app that utilizes JavaScript to dynamically create HTML elements with corresponding data.
